Chromebooks

an underdog?[1]

this presentation is open source: github.com/falkorichter/presentations

Why should develops care?

- [cheap](#) (300€ including keyboard, sometimes cheaper)

- ARM

- 10 years old

- Web + Android

- USI stylus ([1](#), [2](#) ["first grab my green"](#)

wayfair

- Play Store

- Web (Desktop Chrome)
  screenshots

developer mode

- Android Debug Bridge via IP

- no Android Studio

- Chrome developer mode

- linux console

- linux apps?

  - Signal for desktop not available for ARM

screenshots

my experience

- [Acer CB CP513-1H-S72Y NX.AS6EG.001](#) (ARM convertible)

- [Lenovo IP Duet Chromebook ZA6F0014DE](#) (Tablet with keyboard)

- [Lenovo IdeaPad 3 Chromebook](#) 82KN0006GE B-Ware - 14" FHD, MediaTek MT8183, 4GB (returned, no touch)

- USI stylus
